vhf mills promoted at two important dental fairs

vhf boosts presence in the US, supported by major dental partners

Ammerbuch/Hauppauge, 05/15/2018: To further strengthen its position on the North American dental market, vhf counts on the support of trusted partners. The German manufacturer's newest milling machines will be presented to customers by the resellers Talladium and Pearson Dental, and the material manufacturer VITA at *LMT LAB DAY West* and *CDA Presents Anaheim 2018* in mid-May.

Recently, vhf successfully launched the new R5, a state-of-the-art 5-axis milling and grinding machine at *LMT LAB DAY* in Chicago. Following up on the great momentum, vhf cooperates with Pearson Dental, Talladium, and VITA to meet the high demand for prime desktop milling machines in North America.

Dr. Nicolas Rohde, CEO of vhf Inc., highly values the support: "We're glad to have these great partners at hand – and that they will present our machines to customers at two established exhibitions on the West Coast. We work closely with our partners in order to meet our customers' growing demand for prime dental restorations and to ultimately enable better patient care."

With its *LAB DAY West* 2018 from May 18-19 in Garden Grove, CA, LMT organizes the largest dental laboratory event in the region. The California Dental Association hosts the *CDA Presents* in Anaheim, CA, from May 17-19, offering dentistry courses and workshops, and presenting more than 550 exhibitors.

Visitors have the chance to see vhf's high-end milling and grinding machines for dry or wet processing. The Talladium TR5, the new bestseller in 5-axis milling, will be shown at *LAB DAY West* by Talladium at booth H-10/I-10. Visitors can see the K5, a 5-axis dry milling machine, at Pearson's *LAB DAY West* presence (booth F-6) and the Z4, the innovative wet mill for same day dentistry restorations at *CDA Presents* (booth 408). VITA will exhibit the K5 in Garden Room 4 at *LAB DAY West*.
