

Largest presence at Chicago shows for vhf ever

vhf celebrates two world premieres in Chicago

Ammerbuch/Hauppauge, NY – February 11, 2020: During this year’s LMT Lab Day in Chicago, from February 20 to 22, vhf will present two brand new milling and grinding machines. Additionally, Daniel Alter, MSc, MDT, CDT and professor for restorative dentistry will give an exclusive lecture on the advantages of vhf products. At the CDS Midwinter Meeting, which takes place at the same time in Chicago, vhf will present their flagship machines Z4 and R5.

Mill dental restorations quickly, precisely and comfortably: vhf is proud to introduce two new models as world premieres to the market at the 36th LMT Lab Day at booth E-40 (East Tower Riverside in the Hyatt Hotel in Chicago).

In his lecture “vhf’s Milling: A Class Above the Rest!” on Thursday, February 20, from 1 pm to 2 pm, Daniel Alter offers Lab-Day visitors help in making a purchase decision for the laboratory. He will explain the advantages of the various vhf machines based on investment costs, increased productivity and the minimal amount of work for cleaning, calibrating or changing blanks. Interested visitors can register online for this lecture in the Grand Ballroom EF. Daniel Alter has more than 25 years of experience in dentistry and has been running a successful dental laboratory for ten years. He is also Professor of Restorative Dentistry at the City University of New York and is Editor-in-Chief of the well-known magazine *Inside Dental Technology* (IDT). During the 92nd Annual Scientific Meeting of the American Prosthodontic Society visitors will hear the latest on digital practice workflows with the R5: on February 20, the internationally renowned dentist Dr. Miguel Stanley will speak about “Analog to Digital in Implant and Restorative Dentistry”.

“vhf was an eye-catcher” – this is how the organizers of the Midwinter Meeting of the Chicago Dental Society praised the vhf booth last year. This year, the two award-winning dental mills Z4 and R5 will be presented during the dental meeting from February 20 to 22. Visitors can experience the wet and dry milling machines at the CDS Midwinter Meeting at vhf booth 4839.

vhf machines will also be showcased during the Chicago shows at the Dentcore, Esthetic Professionals, Jensen, Patterson, Talladium, and Zahn booths as well as at our partners' 3Shape, exocad and Keystone.
