

vhf and Opulent announce partnership as of February 2023

**A great combination of high-end milling technology
and digital workflow knowledge.**

vhf is pleased to announce Opulent Digital Specialists as a new reseller of their milling machines in the United States. With the spectacular launch of vhf's new E series in February, the California-based reseller has begun to sell the new E5 and E4 together with vhf's high-quality tools.

The CEO of vhf Inc., Dr. Nicolas Rohde, is looking forward to this strategic cooperation: "Despite its relatively young age, Opulent is widely recognized for being an expert in dental CAD/CAM solutions due to the many years of experience the team has. Our companies share the same philosophy in terms of education and customer service, and I am very excited about this new partnership."

Jesse Zamarripa, co-founder of Opulent explains his motivation of partnering with vhf: "Our mission is to make the CAD/CAM experience of our customers a smooth and easy one; hence, the new EASE class of vhf is a great match for us. These mills are not only highly precise and versatile, but they are also priced very competitively."

Opulent Digital Specialists was founded by CAD/CAM professionals who weren't happy with the status quo of the CAD/CAM industry in dental. Their team brings real-world knowledge to every step of the searching, purchasing, and installing process of their customers. Right from the start, Opulent customers can expect hands-on training and support for a positive dental CAD/CAM experience.

About vhf:

vhf camufacture AG was founded in 1988 and is a leading manufacturer of dental milling machines. As a CAM full-solution provider, vhf develops milling machines, tools and software all in-house. The vhf Group has its headquarters in Ammerbuch near Stuttgart, and has approximately 350 employees. Two sales offices in New York and Shanghai serve North America and South East Asia.
